

Wisconsin Statewide Indicator 14 Post School Outcomes (PSO) Survey of Exiters with Disabilities All Participating Districts

Wisconsin School Districts and 2r Charters are required to participate in the Wisconsin Indicator 14 Post School Outcomes Survey once within a five-year cycle as required by the [DPI's Cyclical Indicators](#) data collection. In non-required years, any district or 2r Charter with a secondary population can choose to participate to collect valuable information on local former exiters who received special education services. Collectively, the outcomes of required district respondents are reported to the Office of Special Education Programs (OSEP) to fulfil the state's reporting responsibility. In 2019, 77 required districts participated, and an additional 224 districts participated electively.

Former students are interviewed one year after exiting high school with a regular diploma or a certificate of attendance, by reaching the maximum age of eligibility for services, or by dropping out of school. Districts can view their required year Indicator 14 Report by clicking the **District Indicator 14 Reports** link at <https://www.indicator14wi.org>. Districts can view additional local outcomes data and reports by logging into the secure portion of the Indicator 14 website.

The table below represents the data collection and reporting definitions and outcomes for the past four survey years and includes all districts participating within each survey year. Overall, 82% of former students are participating in some type of postsecondary education, training or employment.

Indicator 14 Post School Outcomes of Wisconsin Exiters with Disabilities within the Year of Leaving High School	2019 Outcomes 2017-18 Exiters N= 4508 of 6828 66% Response Rate	2018 Outcomes 2016-17 Exiters N= 3958 of 7727 51% Response Rate	2017 Outcomes 2015-16 Exiters N= 2285 of 4164 55% Response	2016 Outcomes 2014-15 Exiters N= 2378 of 4257 56% Response Rate
